Customized Precision since 1906

# Precision in third generation

## Precisión en la tercera generación

### SPECIALIZATION FOR MORE THAN 115 YEARS

Gustav Neuhäuser founded the company in 1906 with the vision of crafting high-precision cutting tools for metalworking. For more than a century, we have been developing competent solutions FOR and WITH our customers for their machining requirements.

Highly specialized unique and standard tools, perfectly adapted to their respective machining task, form the center of our innovations and services.

Our team of qualified specialists continuously develops the technical specifications of our tools to optimize performance.

### ESPECIALIZACIÓN DURANTE MÁS DE 115 AÑOS

Gustav Neuhäuser fundó la empresa en 1906 con el objetivo de fabricar herramientas de corte de alta precisión para el trabajo en metal. Durante más de un siglo, hemos desarrollado soluciones competentes PARA y CON nuestros clientes para satisfacer sus requisitos de mecanizado.

El centro de nuestras innovaciones y servicios lo constituyen herramientas altamente especializadas y estándar, adaptadas perfectamente a su respectiva tarea de mecanizado.

Nuestro equipo de especialistas cualificados desarrolla continuamente las especificaciones técnicas de nuestras herramientas con el fin de optimizar el rendimiento.

# Cutting tools from specialists

## Herramientas de corte de especialistas

### HIGH-END SOLUTIONS FOR YOUR REQUIREMENTS

Customer-specific tools are our specialty: Are you looking for a tool in dimensions which are not listed in a catalog? Or do you need support to optimize the performance of your process in terms of surface, tool life and machining time? NEUHÄUSER is at your disposal with its extensive knowledge of cutting materials, coatings and cutting geometries. All with the aim of finding the most economical solution for your cutting, slot milling or profile milling process.

Our application engineers will support and advise you during the planning phase of your process. This is how we develop your precision cutting tool together with you – perfectly matched to your process.

### SOLUCIONES DE ALTA GAMA PARA SATISFACER SUS REQUISITOS

Nuestra especialidad son herramientas específicas para el cliente: ¿Está buscando una herramienta en unas dimensiones que no se indican en el catálogo? ¿O bien necesita ayuda para optimizar el rendimiento de su proceso en cuanto a superficie, vida útil de la herramienta y tiempo de mecanizado? NEUHÄUSER está a su disposición con sus amplios conocimientos en materiales de corte, recubrimientos y geometrías de corte. Todo ello con la finalidad de encontrar la solución más rentable para su proceso de corte, de fresado de ranuras o de fresado de perfiles.

Nuestros ingenieros de aplicaciones le ayudarán y asesorarán durante la fase de planificación de su proceso. Así es como desarrollamos su herramienta de corte de precisión junto con usted, perfectamente adaptada a su proceso.

### OUR HIGH-END-TOOLS:

- made of selected carbides, high speed and cobalt steels
- toothed with innovative cutting edge geometries
- coated with PVD or CVD coatings
- manufactured on high-precision CNC grinding centers
- in combination with an optimal heat treatment

Our sales representatives and technicians are at your service for your individual specialist advice.

### PRODUCTION WITH COMPETENCE

With many years of experience, our own mechanical engineering and continuous development of our employees form the basis for a precise implementation of your requirements via tools with the highest precision. Based on our extensive stock of raw materials and semi-finished products, we can guarantee you short and reliable delivery times.

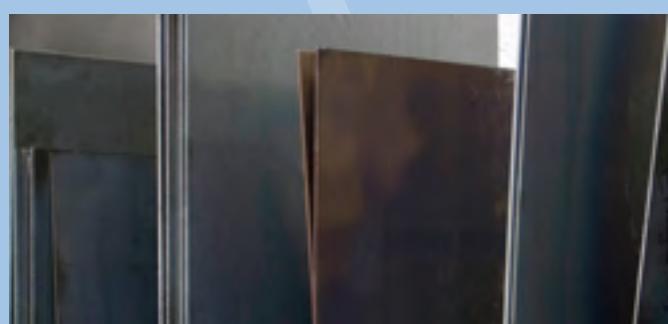

### NUESTRAS HERRAMIENTAS DE ALTA GAMA:

- fabricadas con carburos seleccionados, aceros de alta velocidad y aceros aleados con cobalto
- dentados con geometrías innovadoras
- con recubrimientos de PVD o CVD
- fabricadas en centros de mecanizado CNC de alta precisión
- en combinación con un tratamiento térmico óptimo

Nuestros representantes de ventas y técnicos están a su entera disposición para ofrecerle asesoramiento experto personalizado.

### FABRICACIÓN COMPETENTE

Con muchos años de experiencia, nuestra propia ingeniería mecánica y el desarrollo continuo de nuestros empleados constituyen la base de una implementación precisa de sus requisitos mediante herramientas con la máxima precisión. Sobre la base de nuestro gran stock de materias primas y productos semiacabados, podemos garantizarle tiempos de suministro breves y fiables.

# PRECISION IN TOOLS

## PRECISIÓN EN HERRAMIENTAS DE CORTE

### PRECISION THROUGH INNOVATION

State-of-the-art and extremely flexible machines for the manufacture of precision tool series of any batch size produced in our production center in Prüm.

Our design department creates the best production conditions through individualized and automated machines that deliver the highest level of efficiency. Optimal conditions for tomorrow's cutting edge geometry.

### PRECISIÓN A TRAVÉS DE LA INNOVACIÓN

Máquinas de altas prestaciones y muy fiables para la fabricación de herramientas de precisión en serie en cualquier tamaño manufacturadas en nuestro centro de producción en Prüm.

Nuestro departamento de diseño crea las mejores condiciones de producción mediante máquinas personalizadas y automatizadas que proporcionan el máximo nivel de eficiencia. Condiciones óptimas para la fabricación de herramientas de corte en geometrías innovadoras.

### OPTIMUM HARDNESS

#### - IN-HOUSE VACUUM HARDENING SYSTEMS

Precisely controlled vacuum hardening guarantees a reliable setting of the tool hardness and toughness and thus lays the foundation for the wear resistance of our high-speed and cobalt steel tools.

#### DUREZA ÓPTIMA – SISTEMAS DE TEMPLADO EN VACÍO PROPIOS EN LA EMPRESA

El temple en vacío controlado con precisión garantiza un ajuste fiable de la dureza y la resistencia de la herramienta, lo que sienta la base para la resistencia al desgaste de nuestras herramientas de corte de alta velocidad y de aceros aleados al cobalto.

### COATINGS: AGAINST WEAR AND ADHESION

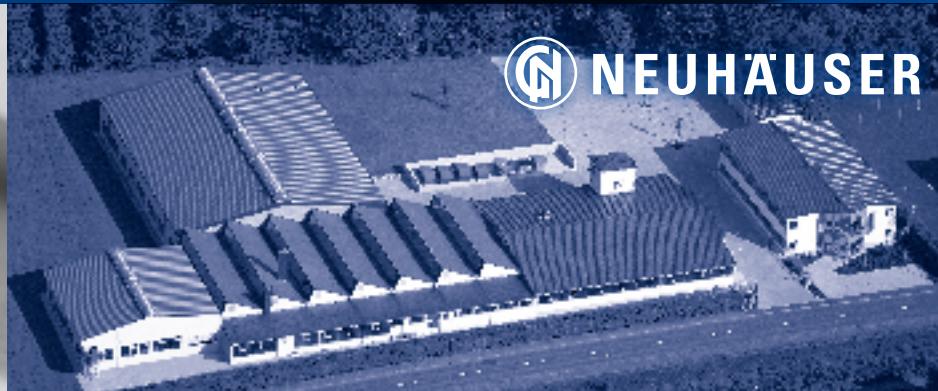

Modern PVD and CVD coatings can significantly increase the efficiency of cutting tools. But which coating is the right one? Depending on the workpiece material to be machined and other process conditions, we can provide a large portfolio of different coatings to minimize wear and friction. We'll gladly advise you.

### RECUBRIMIENTOS: CONTRA EL DESGASTE Y LA ADHESIÓN

Los modernos recubrimientos de PVD (deposición física de vapor) o CVD (deposición química de vapor) pueden aumentar considerablemente la eficacia de las herramientas de corte. ¿Pero qué recubrimiento es el adecuado? En función del material de la pieza de trabajo que debe mecanizarse y otras condiciones del proceso, podemos ofrecer una amplia gama de distintos recubrimientos para minimizar el desgaste y la fricción. Estaremos encantados de asesorarle.

# Applications around the world

## Aplicaciones en todo el mundo

NEUHÄUSER Präzisionswerkzeuge GmbH is a sales, development and production center that serves all markets in Europe, Asia, Africa and South America. CONTROX Inc. in Springfield, Ohio, is a 100% subsidiary of NEUHÄUSER Präzisionswerkzeuge GmbH and serves the North and Central American markets. This ensures optimal support for all customers.

Together with our sales partners, we offer you direct and competent contact partners for your individual requirements on site.

NEUHÄUSER Präzisionswerkzeuge GmbH es un centro de ventas, desarrollo y producción que suministra a todos los mercados de Europa, Asia, África y América del Sur. CONTROX Inc. en Springfield, Ohio, es una filial al 100 % de NEUHÄUSER Präzisionswerkzeuge GmbH que provee a los mercados de América del Norte y América Central. De este modo, se garantiza un soporte óptimo para todos los clientes.

Junto con nuestros socios de ventas, le ofrecemos socios de contacto directos y competentes para sus requisitos individuales in situ.

# Recommendations for tool selection

## Recomendaciones para la selección de herramientas

### MATERIALS

A very stable process is required for the usage of **solid carbide saws**. In addition to a **rigid mounting of the saw on a low-vibration machine**, this also includes a **stable clamping of the work piece**.

In other case, we recommend the use of circular saw blades made of HSS or HSS-Co.

### NUMBER OF TEETH

In general, we recommend a minimum of two teeth – three in case of staggered toothing – and a maximum of five teeth engaged.

**Three teeth engaged** are considered ideal to avoid vibrations and excessive cutting pressures. In the catalog you should select the saw closest to the ideal number of teeth.

Information on feed rate and cutting speed can be found in chapter "Technical Data & Explanations" on page 54.

### TOOTH FORM

Information on tooth forms can be found in the Appendix "Technical Data & Explanations" starting on page 52.

### COATINGS

In order to maximize economic efficiency, **various coatings can be applied to our catalog cutting tools**. Please contact our application engineers, who will issue a **corresponding coating recommendation**.

### MATERIALES

Para el uso de **sierras de metal duro** es necesario un proceso muy estable. Además de un **montaje rígido de la sierra en una máquina con pocas vibraciones**, esto también incluye una **sujeción estable de la pieza a cortar**.

De lo contrario, recomendamos utilizar **sierras circulares de metal de acero rápido (HSS)** o **acero rápido aleado con cobalto (HSS-Co)**.

### NÚMERO DE DIENTES

Por lo general, recomendamos un mínimo de dos dientes, tres en caso de dentado escalonado, y un máximo de cinco dientes engranados.

Para evitar vibraciones y presiones de corte excesivas, el número que se considera ideal son **tres dientes engranados**. En el catálogo debería seleccionar la sierra que más se acerque al número ideal de dientes.

Encontrará información sobre la velocidad de alimentación y de corte en el capítulo «**Datos técnicos y explicaciones**» en la página 54.

### FORMA DEL DIENTE

Encontrará información sobre las formas del diente en el Anexo en la página 52.

### REVESTIMIENTOS

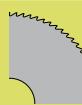

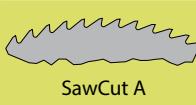

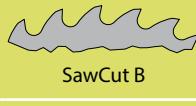

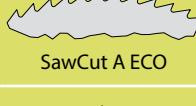

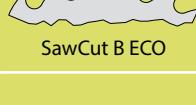

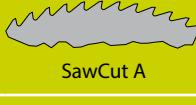

Para maximizar la rentabilidad pueden aplicarse **distintos revestimientos a nuestras herramientas de corte del catálogo**. Póngase en contacto con nuestros ingenieros de aplicación para que le envíen la correspondiente recomendación de revestimiento.

## SPECIAL DIMENSIONS OR SPECIAL APPLICATIONS?

Talk to us. We are happy to manufacture custom-made products for you in regard to tool dimensions, tooth geometries, interfaces, cutting materials and coatings. For special inquiries please contact us or use our forms on [www.controx.com](http://www.controx.com) (link on page 46/47).

## ¿DIMENSIONES ESPECIALES O APLICACIONES ESPECIALES?

Póngase en contacto con nosotros. Estaremos encantados de fabricar productos personalizados para usted en cuanto a las dimensiones de la herramienta, las geometrías del dentado, las interfaces, los materiales de corte y los revestimientos. Para peticiones especiales consúltenos o bien utilice nuestros formularios en [www.controx.com](http://www.controx.com) (enlace en la página 46/47).

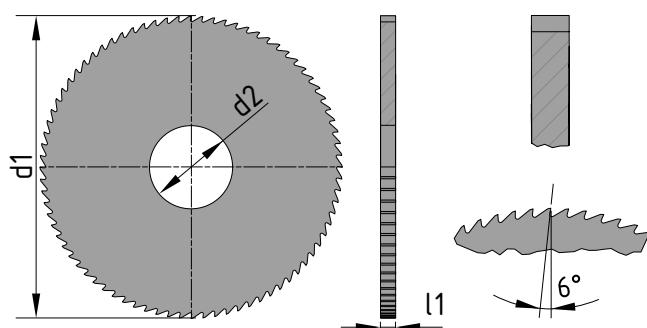

# Circular Saw Blades

coarse pitch · SawCut B

## Sierras circulares

acabado grueso · SawCut B

material/ materiales	optional modification/ modificación opcional	Tolerances / tolerancias (inch)		
		$d_1$	$l_1$	$d_2 - H6$ ANSI
Solid Carbide metal duro	coatings / revestimiento	1"- 4"	$\pm .0039"$	$\pm .0006"$ $\frac{3}{8} - \frac{5}{8}"$ 1" $+.0004"$ $+.0005"$

### APPLICATION:

For medium to deep slotting and cutoff operations in solid or thick-walled materials.

Ideal for abrasive and high-tensile materials.

### APLICACIÓN:

Para operaciones de ranurado y corte de profundidad media a profunda en materiales sólidos o de paredes finas.

Ideales para materiales abrasivos y de gran resistencia.

0.002" T.I.R. | precisión 0.002"

Fits to all standard saw blades:

1350, 1250, 1160, 1260

se adapta a todas las hojas de sierra

estándar: 1350, 1250, 1160, 1260

# Circular Saw Blades

fine pitch · SawCut A

## Sierras circulares

acabado fino · SawCut A

material/ materiales	standard/ estándar	toothing/ dientado	optional modification/ modificación opcional	Tolerances / tolerancias (mm)			
				$d_1$	$l_1$	$d_2 - H6$	
Solid Carbide metal duro	sim. to/ análogo DIN 1837	DIN 1840AN	coatings / revestimiento	20-125 160	$\pm 0,1000$ $+ 0,1000$ $- 0,2000$	$\pm 0,0150$	5 + 0,0080 8-10 + 0,0090 13-16 + 0,0110 22 + 0,0130 32 + 0,0160

### APPLICATION:

For shallow to medium slotting and cutoff operations in solid or thin-walled materials.

Ideal for abrasive and high-tensile materials.

### APLICACIÓN:

Para operaciones de ranurado y corte de poca profundidad a media en materiales sólidos o de paredes finas.

Ideales para materiales abrasivos y de gran resistencia.

# Circular Saw Blades

coarse pitch · SawCut B

**Sierras circulares**  
acabado grueso · SawCut B

material/ materiales	standard/ estándar	toothing/ dientado	optional modification/ modificación opcional	Tolerances / tolerancias (mm)		
				$d_1$	$l_1$	$d_2 - H6$
Solid Carbide metal duro	sim.to/ análogo DIN 1838	DIN 1840BN	coatings / revestimiento	20-125 $\pm 0,1000$ 160 $+ 0,1000$ $- 0,2000$	$\pm 0,0150$	5    + 0,0080 8-10    + 0,0090 13-16    + 0,0110 22    + 0,0130 32    + 0,0160

## APPLICATION:

For medium to deep slotting and cutoff operations in solid or thick-walled materials.

Ideal for abrasive and high-tensile materials.

## APLICACIÓN:

Para operaciones de ranurado y corte de profundidad media a profunda en materiales sólidos o de paredes finas.

Ideales para materiales abrasivos y de gran resistencia.

# Circular Saw Blades

i. a. for Rhobi-, Bimax-,  
Pressta-Eisele-Machines

## Sierras circulares

para Rhobi-, Bimax-,  
Pressta-Eisele-Máquinas

material/ materiales	standard/ estándar	toothing/ dientado	optional modification/ modificación opcional	Tolerances / tolerancias (mm)		
				d <sub>1</sub>	l <sub>1</sub>	d <sub>2</sub> - H6
Solid Carbide metal duro	EN-STANDARD ESTÁNDAR GN	customized/ personalizada	coatings / revestimiento	100-125    ± 0,1000 180-200    + 0,1000 - 0,2000	± 0,0150	22    + 0,0130

### APPLICATION:

For special use on Rohbi-, Bimax-, Pressta-Eisele- and other machines in abrasive and high-tensile materials.

### TOOTHING:

Toothing according to customers demand.

For toothing one additional week delivery time.

The saws are polished and have an axial runout tolerance  $\leq 0,05$  mm.

### APLICACIÓN:

Para uso especial en máquinas de Rohbi, Bimax, Pressta-Eisele y otras máquinas en materiales abrasivos y de gran resistencia.

### DENTADO:

Dentado según los requisitos del cliente. Para el dentado el tiempo de entrega se prolonga en una semana.

Las sierras están pulidas y poseen una tolerancia de salto axial  $\leq 0,05$  mm.

# Circular Saw Blades

coarse pitch · SawCut B ECO

## Sierras circulares

acabado grueso · SawCut B ECO

material/ materiales	standard/ estándar	toothing/ dientado	optional modification/ modificación opcional	Tolerances / tolerancias (mm)		
				d <sub>1</sub>	l <sub>1</sub>	d <sub>2</sub> – H7
HSS	HSS-Co	DIN 1838		50-125	± 0,1000	
			coatings and/or alternating chamfers / revestimiento y/o chaflanes alternos	160-200	+ 0,1000 - 0,2000	± 0,0150
		DIN 1840BN		250	+ 0,1000 - 0,3000	13-16 22 32
	l <sub>1</sub> ≤ 2 mm	l <sub>1</sub> > 2 mm				+ 0,0180 + 0,0210 + 0,0250

### APPLICATION:

For medium to deep slotting and cutoff operations in solid or thick-walled materials.

### APLICACIÓN:

Para operaciones de ranurado y corte de profundidad media a profunda en materiales sólidos o de paredes finas.

### APPLICATION:

For very shallow slotting and cutoff operations in thin-walled precious metals like gold and silver.

### APLICACIÓN:

Para operaciones de ranurado y corte muy superficiales en metales preciosos de paredes finas como oro y plata.

# Recommendations for tool selection

## Recomendaciones para la selección de herramientas

### CUTTING TOOL MATERIAL

The given process conditions are the starting point of the side milling cutter selection and decisive for the choice of the cutting tool material. If major vibrations are to be expected during the machining process, such as on unstable machining centers or as a result of unfavorable tool interfaces and workpiece clamping, an HSS-Co side milling cutter of type 2470/2410/2411 is the first choice.

In case these can be excluded, a solid carbide side milling cutter of type 5410 is the more economical alternative in terms of tool life and machining speed due to its significantly higher hardness and temperature resistance.

### SIDE MILLING CUTTERS 2470/5410/2410/2411

Staggered toothed side milling cutters of type 5410, 2410 and 2411 are mainly suitable for **grooving and cutting operations with medium engagement lengths**. Their toothing is primarily designed for machining unalloyed and alloyed steels, as well as Cu alloys and AISi alloys.

### COATINGS

In order to maximize economic efficiency, various coatings can be applied to our catalog cutting tools. Please contact our application engineers, who will issue a corresponding coating recommendation.

### MATERIAL DE LA HERRAMIENTA DE CORTE

Las condiciones del proceso dadas son el punto de inicio de la selección de las fresas de disco y decisivas para elegir el material de la herramienta de corte. En caso de que se esperen vibraciones importantes durante el proceso de mecanizado, como en centros de mecanizado inestables o debido a interfaces de la herramienta y sujeción de la pieza de trabajo desfavorables, deberá optarse en primera instancia por una fresa de disco de acero rápido aleado con cobalto (HSS-Co) del tipo 2470/2410/2411.

De no ser posible, la alternativa más rentable será una fresa de disco de carburo sólido del tipo 5410 en cuanto a la vida útil de la herramienta y la velocidad de mecanizado gracias a su dureza y resistencia a la temperatura considerablemente mayores.

### FRESAS DE DISCO 2470/5410/2410/2411

Las fresas de disco con dentado escalonado del tipo 5410, 2410 y 2411 resultan muy adecuadas para **operaciones de ranurado y corte con longitudes medianas**. Su dentado se ha diseñado principalmente para aceros no aleados y aleados de mecanizado, así como aleaciones de Cu y aleaciones AISi.

### REVESTIMIENTOS

Para maximizar la rentabilidad pueden aplicarse distintos revestimientos a nuestras herramientas de corte del catálogo. Póngase en contacto con nuestros ingenieros de aplicación para que le envíen la correspondiente recomendación de revestimiento.

### SPECIAL DIMENSIONS OR SPECIAL APPLICATIONS?

Talk to us. We are happy to manufacture custom-made products for you in regard to tool dimensions, tooth geometries, interfaces, cutting materials and coatings. For special inquiries please contact us or use our forms on [www.controx.com](http://www.controx.com) (link on page 46/47).

### ¿DIMENSIONES ESPECIALES O APLICACIONES ESPECIALES?

Póngase en contacto con nosotros. Estaremos encantados de fabricar productos personalizados para usted en cuanto a las dimensiones de la herramienta, las geometrías del dentado, las interfaces, los materiales de corte y los revestimientos. Para peticiones especiales consúltenos o bien utilice nuestros formularios en [www.controx.com](http://www.controx.com) (enlace en la página 46/47).

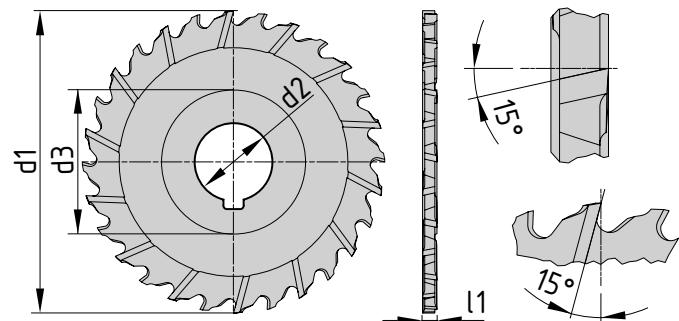

# Side Milling Cutters

staggered teeth

## Fresas de disco

dentado escalonado

material/ materiales	optional modification/ modificación opcional	Tolerances / tolerancias (inch)			
		$d_1$	$l_1$	$d_2 - H7$ ANSI	
HSS- Co	coatings / revestimiento	2" 2 1/2"- 4" 5"	$\pm .004"$ $\pm .006"$ $\pm .008"$	$\pm .0012"$	$5/8"$ $7/8"-1"$ $+.0007"$ $+.0008"$

### APPLICATION:

For wide and deep slotting and plunging operations, where a fine surface finish on the side walls is required. The staggered tooth design enables chatter-free operations and high feed rates. Side Milling Cutters 1/4" and wider can be used for side milling.

For materials up to 1200 N/mm<sup>2</sup>.

### APLICACIÓN:

Para operaciones de ranurado e inmersión anchas y profundas en las que se precisa un acabado fino de la superficie en las paredes laterales. El diseño del dentado escalonado permite operaciones sin rebabas y altas velocidades de alimentación. Las fresas de disco de 1/4" y más anchas pueden utilizarse para el fresado lateral.

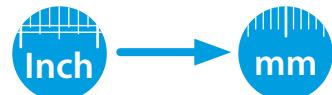

Para materiales hasta 1200 N/mm<sup>2</sup>.

# Special precision cutting tools

*Herramientas de corte especiales de alta precisión*

## Circular Saw Blades

made of HSS-/Co and Solid Carbide

Ø up to 10" · widths from 0.004"

## *Sierras circulares*

fabricadas con acero rápido (HSS)/aleado

con cobalto y carburo sólido

Ø hasta 10" · anchos desde 0.004"

## Side Milling Cutters

made of HSS-/Co and Solid Carbide

Ø up to 10" · widths from 0.05"

## *Fresas de disco*

fabricadas con acero rápido (HSS)/aleado

con cobalto y carburo sólido

Ø hasta 10" · anchos desde 0.05"

## Profile Milling Cutters

made of HSS-/Co and Solid Carbide

## *Fresas de perfil*

fabricadas con acero rápido (HSS)/aleado

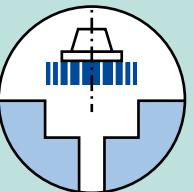

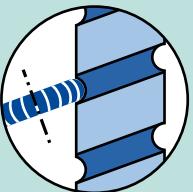

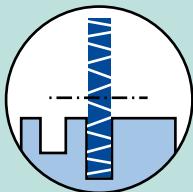

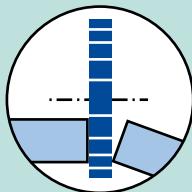

con cobalto y carburo sólido

# Applications by industries ...

## Aplicaciones por industrias...

### Automotive and Mechanical Engineering

#### Ingeniería de la automoción y mecánica

cut-off- and dicing saws · circular knives and cutting wheels · form milling cutters · oil groove cutters, splitting saw blades, gap saw blades · prism cutters, half-round cutters · roll forming tools, pins · perforating knives · keyseat cutters, t-slot milling cutters

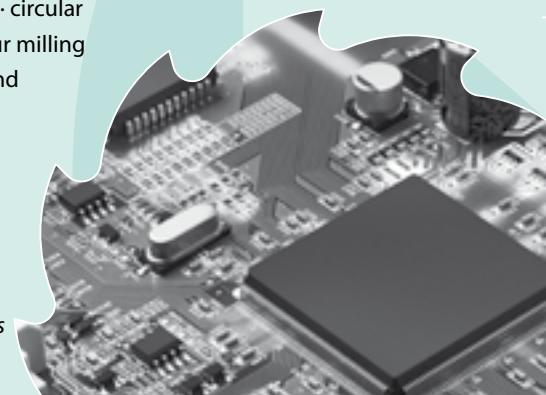

sierras de inglete y rebanadoras · cuchillas circulares y discos de corte · fresas para moldes · cortadores para ranuras de lubricación, hojas de sierra separadoras, hojas de sierra para huecos · cortadores de prisma, cortadores semirredondos · herramientas para laminados, pines · cuchillas perforadoras · cortadores keyseat, fresas para ranuras en T

### Electronics

#### Electrónica

insulation groove cutters · collector cutters, commutator cutters · balancing cutters · V-scoring blades, V-groove cutters · cutting saws for depaneling, depaneling knives · scoring saws · circular knives, crush cut knives · profile-, form-, contour milling cutters · circular saw blades · blanks for CBN- and diamond cutting wheels

cortadores para ranuras de aislamiento · cortadores para colectores, cortadores para conmutadores · cortadores compensadores · cuchillas con punta en V, cortadores para ranuras en V · sierras de corte para separación de placas, cuchillas para separación de placas · sierras base · cuchillas circulares, cuchillas para triturar · fresas para perfiles, moldes y contornos · hojas de sierra circulares · planchas para discos de corte CBN y de diamante

### Fashion

#### Moda

circular jeweler saw blades, jewelry slotting saw blades · shearing rollers · thin metal slitting saw blades · KZA cutter

hojas de sierra para joyería circulares, hojas de sierra para ranurado en joyería · rodillos de corte · hojas de sierra para el corte de metales delgados · cortador KZA

# Tubes & Pipes

## Tubos y tuberías

orbital saw blades, splitting saws ·  
chamfer cutters, double angle milling  
cutters, V-groove cutters · saw blades  
for Georg Fischer and Axxair pipe  
cutting machines · sickle knives · circular  
saw blades · metal slitting saw blades

# Medical

## Industria médica

oscillating cast saw blades · ring saws  
· form milling cutters

hojas de sierra de fundición oscilantes ·  
sierras de anillo · fresas para moldes

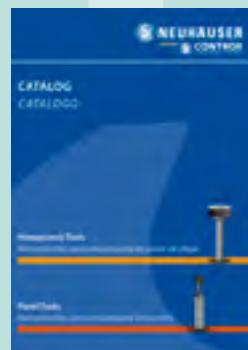

# Aerospace

## Industria aeroespacial

honeycomb tools for Nomex, Kevlar, aluminum, titanium, etc.  
(Core Cut, Valve Type Cut, Profile Cut, Hollow Drill)  
· panel routers (Panel Cut, Decoring Cut) · specials

herramientas en nido de abeja para Nomex, Kevlar, aluminio, titanio,  
etc. (corte de núcleos, corte tipo válvula, corte de perfiles · broca  
hueca) · routers de panel (corte de paneles, corte para eliminación de  
machos) · especiales

## Datos técnicos & Explicaciones

$$V_c = \frac{d \times \pi \times n}{1000} \text{ m/min.}$$

4

Appendix  
Anexo

# Tooth forms

FOR CIRCULAR SAW BLADES

## Tooth form A (Angular Tooth):

For slitting shallow cutting depths and cutting fine profiles and tubes in abrasive and high-strength materials. Due to the lower rake angle of 5°, this tooth form is particularly suitable for machining brittle, short-chipping materials.

Angular Tooth **A**

Dentado angular **A**

Angular Tooth with alternating chamfers **Aw**

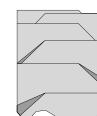

Dentado angular con chaflanes alternantes **Aw**

# Formas del diente

PARA SIERRAS DE CORTE DE METALES

## Forma del diente A (dentado angular):

Para profundidades de corte poco profundos y para el corte de perfiles y tubos finos en materiales abrasivos y de alta resistencia, gracias al ángulo de rebaje inferior de 5°, esta forma de dentado es especialmente adecuado para el mecanizado de materiales frágiles y materiales con viruta corta.

## Tooth form B (Rounded Tooth):

For slitting greater cutting depths and for cutting thick-walled tubes and profiles in abrasive and high-strength materials. The higher rake angle of 15° makes this tooth form particularly suitable for machining tough, long-chipping materials.

Rounded Tooth **B**

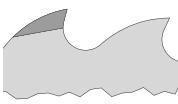

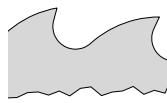

Dentado redondo **B**

Rounded Tooth with alternating chamfers **Bw**

Dentado redondo con chaflanes alternantes **Bw**

## Forma del diente B (dentado redondo):

Para profundidades de corte mayores y para el corte de perfiles y tubos de paredes gruesas en materiales abrasivos y de alta resistencia. El ángulo de rebaje mayor de 15° hace que esta forma del dentado sea especialmente adecuada para el mecanizado de materiales duros y materiales con viruta larga.

## Tooth form C (Triple Chip Tooth):

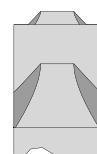

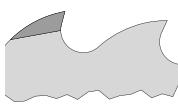

For cutting solid material and thick-walled pipes. The tooth form creates a centering effect due to the higher pre-cutting tooth and thus prevents the saw from off-centered running.

Triple Chip Tooth **C**

Diente astillado triple **C**

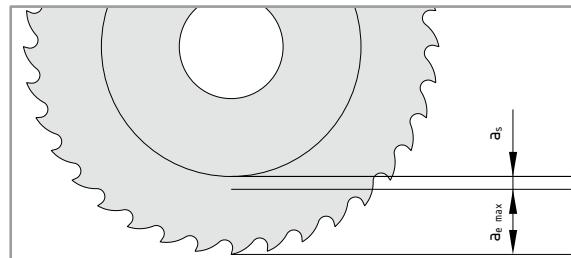

## Forma del diente C (diente astillado triple):

Para cortar material sólido y para tuberías de paredes gruesas. La forma del diente crea un efecto de centraje debido al dentado de precorte más elevado lo que evita que la sierra funcione descentrada.

# Radial Cutting Depth

FOR CIRCULAR SAW BLADES & SIDE MILLING CUTTERS

# Profundidad de corte radial

PARA SIERRAS DE CORTE DE METALES Y FRESAS DE DISCO

$a_{e\max}$  = maximum radial cutting depth  
profundidad de corte radial máxima

$a_s$  = safety distance  
distancia de seguridad

# Formulars

FOR THE CALCULATION OF CUTTING SPEED,  
RPM AND FEED RATE

cutting speed /  
velocidad de corte

$$V_c = \frac{d \times \pi \times n}{1000} \text{ m/min.}$$

rpm / rpm

$$n = \frac{V_c \times 1000}{d \times \pi} \text{ U/min.}$$

feed rate / velocidad  
de alimentación

$$V_f = f_z \times Z \times n \text{ mm/min.}$$

d = Cutter-Ø / Ø del cortador

n = rpm / rpm

$\pi = 3,14$

$f_z$  = feed/tooth / avance/diente

Z = No. of teeth / No. of diente

No definite values can be given for the feed per tooth ( $f_z$ ), as these values depend on the working conditions of the tool, the tool dimension, the material to be machined and the cutting process. The values for the feed per tooth ( $f_z$ ) reach from 0,005 up to approx. 0,2 mm per tooth.

Generally, when establishing the application data and cutting values the condition and stability of the whole system – machine, tool, workpiece and chucking – has to be included into the evaluation.

## RPM-Table

Tool/ herramienta	Cutting Speed $V_c$ in m/min. velocidad de corte $V_c$ en m/min.										
	Ø d	10	12,5	16	20	25	32	40	50	63	80

Values for cutting speed above 100 m/min.

=  $V_c$ -Value × factor 10 and rpm × factor 10.

# Formularios

PARA EL CÁLCULO DE LA VELOCIDAD DE CORTE, R. P. M.  
Y VELOCIDAD DE ALIMENTACIÓN

No pueden ofrecerse valores definitivos para el avance por diente ( $f_z$ ), ya que estos valores dependen de las condiciones de trabajo de la herramienta, las dimensiones de la herramienta, el material que debe mecanizarse y el proceso de corte.

Los valores para el avance por diente ( $f_z$ ) van de 0,005 hasta aprox. 0,2 mm por diente.

En general, al establecer los datos de aplicación y los valores de corte, debe incluirse en la evaluación el estado y la estabilidad de todo el sistema – máquina, herramienta, pieza de trabajo y sujeción.

## Tabla RPM

# **! WARNING!**

Any cutting tool may break or shatter under improper use. Government regulations require use of safety glasses and other appropriate safety equipment at all times in the vicinity of use. Do not touch cutting edges or chips with bare hands. Stop cutting when the tool becomes dull. Stop cutting operation immediately if you hear any strange sounds. Use correct tools for the operation. Check dimensions to ensure proper selection. Do not modify tools. Wet or dry grinding of cutting tools produces potentially hazardous dusts or mists; to avoid adverse health effects, use adequate ventilation and read the Material Safety Data Sheet for further application tool material or grade before grinding.

# **! ¡ADVERTENCIA!**

Cualquier herramienta de corte puede romperse o destruirse si no se utiliza de forma adecuada. Las regulaciones gubernamentales establecen el uso de gafas de seguridad y otro equipamiento de protección adecuado siempre que se utilicen o se esté cerca de dichas herramientas. No toque los filos ni las astillas sin guantes. Deje de cortar cuando la herramienta se apague. Detenga la operación de corte inmediatamente en caso de que escuche algún ruido extraño. Utilice herramientas adecuadas para la operación. Compruebe las dimensiones para garantizar una selección adecuada. No modifique las herramientas. El amolado en mojado o en seco de herramientas de corte genera polvos o neblinas potencialmente peligrosos; para evitar efectos perjudiciales para la salud, utilice una ventilación adecuada y lea la Hoja de datos de seguridad de los materiales para seguir aplicando el material de la herramienta o modificarlo antes del amolado.

**ADVERTENCIA: Este producto contiene cobalto, un elemento químico que en el Estado de California está considerado como cancerígeno. Para más información visite [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)**

## **Limited Warranty**

Neuhäuser warrants to original equipment manufacturers, distributors and industrial and commercial users of its products that each new product manufactured or supplied by Neuhäuser shall be free from defects in material and workmanship.

Neuhäuser's obligation under this warranty is limited to furnishing without additional charge a replacement or, at its option, repairing or issuing credit for any product which shall within one year from the date of sale be returned freight prepaid to the plant designated by a Neuhäuser representative and which upon inspection is determined by Neuhäuser to be defective in materials or workmanship.

Complete information as to operating conditions, machine setup and application of cutting fluid should accompany any product returned for inspection. The provisions of this warranty shall not apply to any Neuhäuser product which has been subjected to misuse, improper operating conditions, machine setup or application of cutting fluid or which has been repaired or altered if such repair or alteration in the judgment of Neuhäuser would adversely affect performance of the product.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Neuhäuser shall have no liability or responsibility on any claim of any kind, whether in contract, tort or otherwise, for any loss or damage arising out of, connected with, or resulting from the

## **Garantía limitada**

Neuhäuser garantiza a los fabricantes de equipamiento original, distribuidores y usuarios industriales y comerciales de sus productos que todos los productos nuevos fabricados o suministrados por Neuhäuser estarán exentos de defectos tanto en lo referente al material como a la mano de obra.

La obligación de Neuhäuser según esta garantía se limita a facilitar sin tasas adicionales un reemplazo o, si así lo decide, reparar u otorgar crédito para cualquier producto que, en el plazo de un año a partir de la fecha de venta, se devuelva con el flete prepagado a la planta indicada por un representante de Neuhäuser y que una vez inspeccionado sea considerado por Neuhäuser defectuoso en cuanto al material o la mano de obra.

Cualquier producto devuelto para su inspección deberá incluir información completa sobre las condiciones de funcionamiento, la configuración de la máquina y la aplicación de fluido de corte. Las provisiones de esta garantía no se aplicarán a aquellos productos de Neuhäuser que hayan estado sujetos a un uso incorrecto, condiciones de funcionamiento, configuración de la máquina o aplicación del fluido de corte inadecuados o que hayan sido reparados o modificados si dicha reparación o modificación según Neuhäuser afectaría negativamente al rendimiento del producto.

ESTA GARANTÍA REEMPLAZA CUALQUIER OTRA GARANTÍA, EXPRESA O IMPLÍCITA, INCLUIDA CUALQUIER GARANTÍA IMPLÍCITA DE COMERCIALIDAD O APTITUD PARA UN FIN PARTICULAR.

Neuhäuser no asumirá ninguna responsabilidad sobre ninguna

manufacture, sale, delivery or use of any product sold hereunder, in excess of the cost of replacement or repair as provided herein. IN NO EVENT SHALL Neuhäuser BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Neuhäuser makes no other warranty, express or implied, except as set forth above; and Neuhäuser neither assumes nor authorizes any other person or entity to assume for it any other obligation or liability in connection with any of its products.

**NOTICE: Because we are constantly engaged in a program of product improvement, tool specifications are subject to change at any time.**

*reclamación de ningún tipo, ya sea por contrato, daño jurídico o de otro tipo, por cualquier pérdida o daño que surja de, relacionado con, o resultante de la fabricación, la venta, el suministro o el uso de cualquier producto vendido a continuación, por un precio superior al coste de reemplazo o reparación según lo dispuesto en este documento.*

*EN NINGÚN CASO, Neuhäuser SERÁ RESPONSABLE DE NINGÚN DAÑO ESPECIAL, ACCIDENTAL O INDIRECTO.*

*Neuhäuser no ofrecerá ninguna otra garantía, expresa o implícita, excepto según lo estipulado arriba; y Neuhäuser tampoco asumirá ni autorizará a ninguna otra persona o entidad a asumir por ello ninguna responsabilidad con relación a cualquiera de sus productos.*

***AVISO: Debido a que estamos permanentemente comprometidos en un programa de mejora de producto, las especificaciones de la herramienta están sujetas a cambios en cualquier momento.***

#### **ADVICES:**

By the publication of this catalogue, all former editions become invalid.

Reprint of this catalogue – also extracts only – is allowed only with our explicit permission.

Considering the continual technical improvements of our tools, we reserve the right to modify the selection in our catalogue. If a required tool is not available for this reason, we will quote you a substitute of equal or better technological standard. If you have any questions, please contact our sales department.

#### **CONSEJOS:**

*Al publicar este catálogo, todas las ediciones anteriores dejan de tener validez.*

*La reimpresión de este catálogo, incluso solo un extracto, solo se permite con nuestro permiso explícito.*

*Teniendo en cuenta las mejoras técnicas continuas de nuestras herramientas, nos reservamos el derecho de modificar la selección en nuestro catálogo. Si por este motivo una herramienta necesaria no está disponible, le ofertaremos un reemplazo con un estándar tecnológico igual o mejor. Si tiene cualquier pregunta, póngase en contacto con nuestro departamento de ventas.*

# Terms of Delivery

## I. General Information

1. Any and all deliveries made and services provided are subject to the Terms of Delivery at hand as well as to separate contractual agreements possibly concluded. Any deviating terms of purchase of the Buyer shall not become a constituent element of the contract even in case of order acceptance.  
A contract shall be established – for lack of specific agreement – with the written order confirmation of the Seller.
2. The Seller reserves property and copyrights for samples, cost estimates, drawings and similar information of physical and non-physical nature – also in electronic form; these may not be disclosed to third parties. The Seller undertakes not to disclose information and documents identified as confidential by the Buyer to third parties without his written consent.
3. Samples shall be supplied only against charges.
4. Verbal supplementary agreements do not exist. Modifications require written form in order to be effective.

## II. Price and Payment

1. The prices – for lack of specific agreement – shall be ex works and do not include packaging. The quoted price of products does not include duty, tariffs, taxes or similar charges, which shall be borne by the Buyer, unless otherwise agreed upon in writing.
2. For lack of specific agreement, payment shall be effected immediately following delivery to the account of the Seller and without any deduction. The respective quantity delivered shall be charged.
3. The Buyer shall have the right to retain payments or to offset these against counterpayments only to the extent that his counterclaims are undisputed and determined legally binding.

## III. Period of Delivery, Default in Delivery

1. The Period of Delivery results from the agreements entered into between the contracting parties. The prerequisite for compliance by the Seller is that any and all commercial and technical questions have been clarified between the contracting parties and that the Buyer has complied with any and all obligations under his responsibility, such as e.g. the procurement of the certificates or authorizations required by the authorities or performance of a down payment. Should this not be the case, the Period of Delivery will be extended appropriately. This shall not apply to the extent that the Seller is responsible for the delay.
2. Adherence to the Period of Delivery shall be subject to correct and on-time delivery to us on the part of our suppliers. The Seller shall inform the Buyer about emerging delays as soon as possible.
3. The Period of Delivery shall be deemed to have been complied with if the delivery item has left the factory of the Seller or if readiness for shipment has been announced.
4. In case that the shipment is delayed upon request of the Buyer, the Seller shall be entitled to otherwise dispose of the delivery item after fixing a reasonable deadline and its fruitless expiry and to supply the Buyer subject to a reasonably extended period. In case that the shipment is delayed on account of reasons for which the Buyer is responsible, the costs incurred as a result of such delay shall be charged to the Buyer, beginning one month after announcement of the readiness for shipment of the delivery item.
5. In case that non-compliance with the Period of Delivery is to be attributed to force majeure, labor disputes or other events beyond the sphere of influence of the Seller, the Period of Delivery shall reasonably be extended. The Seller shall inform the Buyer of the beginning and end of such circumstances as soon as possible.
6. In case that delivery is rendered entirely impossible or economically unreasonable for the Seller as a result of force majeure, labor disputes or other events beyond the sphere of influence of the Seller, the Seller shall have the right to either wholly or partially resign from the contract.  
Claims for damages of the Buyer on account of such resignation are excluded. If the Seller intends to make use of his right of resignation, he shall inform the Buyer immediately upon identification of the implications of such event. This shall also apply if an extension of the Period of Delivery has initially been agreed upon with the Buyer.
7. The Buyer may resign from the contract without fixing a time limit if complete performance is ultimately rendered impossible for the Seller prior to the transfer of risk. The Buyer may furthermore resign from the contract if execution of part of the delivery is rendered impossible for an order and if the Buyer has a legitimate interest to reject a part delivery. If this is not the case, the Buyer shall have to pay the contract price for the respective part delivery. The same shall apply in case of an inability of the Seller. In all other cases, Paragraph VII.2. "Liability" shall apply. In case that the impossibility or inability occurs during the default in acceptance or if the Buyer is alone or predominantly responsible for the circumstances, he shall be obliged to the performance of quid pro quo.
8. In case that the Buyer fixes a reasonable deadline for performance after the due date – taking into consideration the statutory exceptions – and if this deadline is not complied with, the Buyer shall be entitled to resignation within the scope of statutory provisions.

Upon request of the Seller he undertakes to declare within a reasonable time whether he intends to make use of his right of resignation.  
Further claims from Default in Delivery are exclusively governed by Paragraph VII.2. hereunder.

## IV. Transfer of Risk, Acceptance

1. The risk shall be transferred to the Buyer whenever the delivery item has left the factory, namely also if part deliveries are performed or if the Seller has undertaken other services, such as e.g. the forwarding expenses or shipment.
2. In case that delivery is delayed or not undertaken as a result of circumstances not to be attributed to the Seller, the risk shall be transferred to the Buyer at the day the readiness for shipment is announced. The Seller undertakes to effect insurance as requested by the Buyer at the expense of the Buyer.
3. Part deliveries shall be permissible to the extent reasonable for the Buyer.

## V. Reservation of Proprietary Rights

1. The Seller reserves the proprietary right for the delivery item until any and all claims of the Seller versus the Buyer arising from the business relations have been settled, including future claims, also arising from contracts concluded simultaneously or subsequently. This shall also apply if individual or all claims of the Seller were entered into a current account and the balance has been determined and acknowledged.  
In case of behavior of the Buyer contrary to the terms of contract, particularly in case of default in payment, the Seller shall be entitled to withdrawal of the delivery item after overdue notification and the Buyer shall have the obligation to surrender the delivery item. The Buyer is obliged to immediately notify the Seller in case of seizure or other interventions of third parties.
2. The Buyer is entitled to resell the delivery item in ordinary course of business. He, however, already today cedes to the Seller any and all claims arising from the resale versus purchaser or third parties. The Buyer is entitled to collection of said claims also after cession. The authorization of the Seller for collection of the claims on his own is not affected by this.  
The Seller, however, undertakes not to collect the claims as long as the Buyer properly complies with his payment obligations or the authorization to collect has not been revoked or no application for the opening of insolvency procedures has been filed.  
The Seller may otherwise request for the Buyer to disclose the claims ceded and their debtor, providing all information required for collection, handing over all documents pertaining to this, and informing the debtors of the cession, unless already performed by the Seller.  
In case that the delivery item is resold together with merchandise that is not the property of the Seller, the claim of the Seller versus the purchaser shall be deemed to be ceded in the amount of the contract price agreed between Seller and Buyer.
3. The Buyer shall not be entitled to pledge or transfer as security the delivery item.
4. The Buyer hereby grants to the Seller a security interest in the products sold hereunder to secure payment of the price of such products and agrees, and appoints the Seller, its agent, to take all such action and to execute all such documents and instruments as may be necessary or reasonably requested by the Seller to perfect and continue perfected the Seller's security interest hereunder.
5. The Seller shall be entitled to insure the delivery item at the expense of the Buyer against theft, breakage, fire, water, and other damages, unless the Buyer has demonstrably obtained such insurance coverage on his own.
6. If, in connection with the payment of the contract price, a liability of the Seller is established for a bill-of-exchange the reservation of proprietary rights including its special forms agreed upon or other securities agreed upon to secure payment shall not expire before the bill-of-exchange has been honored by the Buyer as debtor.
7. The application for the opening of insolvency procedures shall entitle the Seller to resign from the contract and demand immediate return of the delivery item.

## VI. Claims from Defects

The Seller shall warrant material defects and deficiencies in title of the delivery under exclusion of further claims – subject to Paragraph VII "Liability" – as follows:

### Material Defects

1. All those parts are to be reworked or replaced by parts free of defects – which is at the discretion of the Seller – free of charge, which turn out to be defective on account of circumstances that have occurred prior to the transfer of risk. The Seller is to be informed in writing immediately whenever such defects are determined. Parts replaced shall become the property of the Seller.
2. Upon agreement with the Seller, the Buyer shall grant the Seller the time and opportunity required in order to perform any and all rework and substitute deliveries, which the Seller deems necessary, with the Seller otherwise exempted from liability for the resulting consequences. It is only in urgent cases where the operational safety is jeopardized and/or as defense against disproportionate damages – in which cases immediate notification of the Seller is mandatory – that the Buyer has the right to eliminate the defect himself or have the defect eliminated by third parties and demand compensation for expenditures incurred.

3. Regarding the direct costs resulting from rework and/or substitute delivery, the Seller shall bear the costs for the replacement part including shipment – to the extent that the complaint proves justified.  
In all other cases the Buyer shall bear the costs.
4. Within the scope of statutory provisions, the Buyer has the right to resign from the contract if the Seller – taking into account the statutory exceptions – has allowed a reasonable time fixed for rework or substitute delivery on account of material defect to expire fruitlessly.  
In case of only insubstantial defects, the Buyer only has the right for a reduction of the contract price. The right for a reduction of the contract price is otherwise excluded.  
Further claims are determined by Paragraph VII.2. hereunder.
5. No liability is assumed particularly in the following cases:
  - Unsuitable or improper use, incorrect installation and/or commissioning by Buyer or third parties, natural wear, erroneous and negligent handling, improper maintenance, unsuitable operating materials, chemical, electro-chemical or electrical impact – to the extent that they are not the responsibility of the Seller.
  - The Seller shall assume liability for defects of the material supplied by the Buyer only if the defects could have been identified, had professional diligence been applied.
  - In case of manufacturing based on drawings of the Buyer, the Seller shall assume liability only for execution in accordance with the drawings.
- 5a. If special tools are ordered, the actual delivery quantity is allowed to either exceed or undershoot the order quantity by approx. 10 % or a minimum of 2 units, as required.
6. In case that the Buyer or third parties perform improper rework, the Seller shall not assume any liability for the consequences that result. The same shall apply for modifications of the delivery item made without prior consent of the Seller.

#### **Deficiencies in Title**

7. The Buyer shall assume the sole responsibility for documents such as drawings, gauges, samples or the like to be submitted by the Buyer. It is the Buyer's responsibility to ensure that the workshop drawings submitted by the Buyer do not violate the copyrights of third parties. The Seller has no obligation vis-à-vis the Buyer to investigate if the submission of quotes on the basis of workshop drawings submitted to the Seller constitutes any violation of copyrights of third parties. Should a liability of the Seller nevertheless result from constitutive facts, the Buyer shall indemnify and hold harmless the Seller.

#### **VII. Seller's Liability, Disclaimer of Liability**

1. In case that the delivery item cannot be used by the Buyer in accordance with its contractual purpose by fault of the Seller as a result of negligent or incorrect execution of proposals submitted and consultations performed prior to or following the conclusion of the contract or by violation of other secondary contractual obligations – particularly instructions for operation and maintenance of the delivery item – the stipulations contained in Paragraphs VI and VII.2. shall apply under the exclusion of further claims of the Buyer.
  2. The Seller shall assume liability for damages not established on the delivery item as such – on whatever legal grounds – only
    - a) in case of intent,
    - b) in case of gross negligence of the proprietor / institutions or senior executives,
    - c) in case of intentional or negligent violation of life, body and/or health,
    - d) in case of maliciously concealed defects,
    - e) in case of defects of the delivery item, to the extent that liability is assumed for personal injury or damage to property for privately used items in accordance with the German Product Liability Act (Produkthaftungs-gesetz). In case of culpable breach of material contractual obligations, the Seller shall also assume liability in case of gross negligence of non-executive employees and minor negligence, in the latter case limited to reasonable, foreseeable typical contract damage.
- Further claims are excluded.
3. The Seller shall not be subject to any other obligations or liabilities, whether

arising out of breach of contract, warranty, tort (including negligence and strict liability) or other theories of law, with respect to products sold or services rendered by the Seller or undertakings, acts or omissions relating thereto. Under no circumstances will the Seller be liable for any incidental or consequential damages, or for any other loss, damage or expense of any kind, including loss of profits, arising in connection with the contract or with the use or liability to use the Seller's products furnished under this contract.

#### **VIII. Statute of Limitations**

Any and all claims of the Buyer – on whatever legal grounds – come under the statutes of limitation in 12 months. The statutory time limits shall apply for claims for damages in accordance with Paragraph VII.2. a – e.

#### **IX. Special Conditions for Machining Contracts** (completion, reprocessing, modification or restoration of tools)

The following shall apply for machining contracts as a supplement to/deviating from the Terms of Delivery:

1. The subcontractor shall not assume any liability for the behavior of material submitted. His claim for remuneration remains unaffected.
2. Should the material become unusable during the machining by fault of the subcontractor, his claim for remuneration for the service rendered shall lapse. The claim for damages of the Buyer shall be governed by Paragraph VII.2. hereunder.

#### **X. Return Policy**

1. A Return Goods Authorization (RGA) number must be obtained before returning items.
2. Call 1-800-558-8966 to request a Return Goods Authorization (RGA) number. Be sure to write your RGA number on the shipping label. Returns will not be accepted unless accompanied by this number
3. Please include a copy of your invoice or packing slip.
4. Claims for discrepancies in shipment must be made within 7 days of receipt of merchandise or they will not be accepted.
5. Only items in unused condition and in undamaged, sealed original container may be returned within 30 days of the invoice date
  - 15% Restock fee, an order of equal/greater value will reduce the restock fee to 5%
  - After 30 days / less than 6 month from the invoice date
  - 30% Restock fee, an order of equal/greater value will reduce the restock to 20%
6. Freight must be prepaid
7. Special orders, modified items, used items and obsolete items cannot be returned.
8. A maximum of two stock returns per year is allowed.
9. The stock return cannot exceed 10% of the past 12 month sales.
10. All stock returns must be approved by the National Sales Management. Any deviation from the above Policy must be authorized in writing by the National Sales Management

**This policy supersedes all previous policies and is effective March 13.2017**

#### **XI. Applicable Law, Place of Jurisdiction, Place of Performance**

1. German Substantive Law under the exclusion of UN Purchasing Law shall apply for any and all legal relations between Seller and Buyer.
2. Should disputes arise from or in connection with the contract at hand, the parties shall first attempt to reach an out-of-court settlement. Should this not be possible, disputes shall be ultimately decided by a Court of Arbitration in accordance with the Arbitrary Court Regulation of the German Institution for Arbitration (DIS), excluding the regular legal process. The decision shall be taken by three arbitrators, with each of the two parties appointing one arbitrator and the third arbitrator selected by the two arbitrators appointed. Arbitration procedures shall be in German language and performed at the corporate seat of the exporter.
3. Place of Performance shall be 54595 Prüm, Germany.

**Any and all deliveries performed shall exclusively be based on our Terms of Delivery. We hereby object to any and all contrary terms of purchase.**

#### **TERMS OF DELIVERY FOR REPAIR OF TOOLS AND OTHER CONTRACT JOBS**

- The costs for tool repair and contract grinding are charged on basis of real time consumption.
- The price for tool repair and contract grinding depends mainly on quantities. If quantities mentioned in our quotation or order confirmation are not achieved we may charge a higher price for lower quantities.
- All costs and risks for transports are chargeable to the buyer.
- Contract jobs are to be payed on delivery without deduction.
- Risk for scrap on tool repairs or other contract jobs must be taken by the buyer.
- If scrap is caused by ourselves costs for contract work will not be charged. Under no circumstance we will refund scrapped parts.
- Apart from that our terms and conditions will apply.
